Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-7, drawn to an electro-optical apparatus, classified in class 313, subclass 512.
 - II. Claims 8-16, drawn to a method for manufacturing an electro-optical apparatus, classified in class 445, subclass 24.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions of Group I and Group II are related as process of making and product made.

The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05 (f)). In the instant case the product as claimed can be made by a different process such as by not adhering a jig having at least three micro heads to perform fine adjustment. One could simply hold the device in a vice-like machine while using magnetic heads to perform fine adjustment or another such method.

3. Because these inventions are distinct for the reasons given above, have acquired a separate status in the art as shown by their different classification, and would be a serious burden on the Examiner to search for both, restriction for examination purposes as indicated is proper.

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the

Art Unit: 2879

application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
